Subject: TBT PRG Questions

Hi Kristine,

I have received a number of questions on the new TBT PRG that I am unable to answer. The questions have to do with the large change from the JSCS SLV and endpoints. Can you provide the basis for the new PRG and for which endpoints it is protective. The current Table 3.1 JSCS SLV is 2.3 ug/kg which is based on exposure to freshwater fish from the 2007 DEQ Guidance for Bioaccumulative Chemicals of Concern in Sediment.

Thanks for help with this.
